6-Classroom Extension | Pinewood School | Blackburn

This project was for the construction of a 6-classroom extension to a special needs school together with refurbishment works within the existing school.

The 650m² timber-framed extension features underfloor heating, rooflights and lighting sensors. Work also included the installation of a replacement heating system throughout the existing 1500m² special needs school.

The extension provides classrooms, a soft play area, nurses room, sensory room, meeting, office and storage space.
